

Cosmic Thanksgiving Song

“Cosmic, Thanksgiving Song”

By Ivan Nicoletto

Shared in November 2024 Newsletter of Yale Forum on Religion & Ecology

May we raise
a thanksgiving song
being embraced
and emerging from
billion years of cosmic
overflowing expansion.

From this blue
suspended pearl in space
we dance gratitude
for inter-being with
the astonishing diversity
of earth's creatures.

Thanks, we sing,
to the wellspring
of this dramatic
metamorphic flow
including tears, horrors, and death.

Yet care, compassion, empathy
can sing thanksgiving
even weeping.

Beyond buying and earning,
accumulating and losing
let's plunge into an extravagant
thanksgiving song.
